COURSE OVERVIEW

Go beyond generative AI and learn how to build AI agents with Claude. This hands-on course equips your team to design agents that can plan, make decisions and complete multi-step tasks with minimal supervision.

Learn how to create practical workflows, connect agents to tools and data, and apply the right safeguards for reliable business use.

LEARNING OUTCOMES

- **Understand agentic AI and Claude Agents**, including how they differ from standard chatbots and where they can improve business productivity.
- **Design and configure reliable AI agent workflows** using prompts, roles, goals, tools, memory and data sources.
- **Build and connect Claude Agents for research**, document handling, data lookups and multi-step process automation.
- **Apply guardrails, human review and performance evaluation** to support safe, reliable and responsible AI adoption.
