

WSQ: Microsoft Power BI for Data Analytics: Dashboards, Reports & Insights

(TGS-2026062429)

COURSE OVERVIEW

Turn your data into clear, impactful insights that support better business decisions. This course is designed for learners with basic Power BI knowledge who want to go beyond analysis and present data in a meaningful way.

You will learn how to create interactive dashboards and reports that are easy to understand and visually engaging. The course focuses on using the right charts, layout, and design to make your data clear and useful.

You will also learn how to work with stakeholders to understand their needs and present insights that highlight key trends and business impact.

By the end of the course, you will be able to use Power BI to tell a clear data story, communicate insights effectively, and support confident decision-making.

LEARNING OUTCOMES

- Apply advanced Power BI visualisation tools and techniques to design interactive and impactful data displays.
- Design and develop dashboards and scorecards using structured development processes and strategic visual mapping techniques.
- Incorporate effective layout, navigation, and user experience principles to enhance the usability and clarity of dashboards.
- Evaluate and refine visual outputs (e.g. tables, graphs, dynamic displays) to ensure key stakeholder questions and business needs are addressed.
- Analyse and present data patterns, trends, and correlations using appropriate Power BI methods.
